

**Monitoring and Reporting Violation**  
**Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR)**  
**MONITORING, ROUTINE (DBP), MAJOR/CHLORINE**

The CITY OF INGLESIDE water system PWS ID 2050002 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F.

Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This/These violation(s) occurred in the monitoring period of **April, May, & June 2014 (2<sup>nd</sup> Quarter 2014)**

We are taking the following actions to address this issue:

**The required report on daily chlorine levels within the drinking water was not mailed to the Texas Commission on Environmental Quality in a timely manner. The actual chlorine testing was completed in a timely manner with satisfactory results. The employee(s) responsible for reporting have been retrained in the city's existing procedures regarding required reporting to regulatory authorities. This will ensure that required reporting is done in a timely manner in the future.**

**If you have questions regarding the quarterly DLQOR Report, please contact the Director of Public Works at the telephone number listed below.**
